PSX Live & Research - Strategy Fit Guide

Which strategy is preferred for which stock - every engine strategy backtested on every watchlist stock from 2021-01-01 to today (daily bars, 0.15% commission + 0.1% slippage per side, 2xATR stop, entry at next open). Only strategies with >= 5 trades are ranked; ranking is by NET total return. Generated 04 Oct 2026, 23:56 PKT.

Method: signals close on the bar, fills at next open; costs 0.15% commission + 0.1% slippage each side; protective stop at 2xATR; strategies with fewer than 5 trades excluded from ranking. (*) = the strategy was still holding an open position at the end of the window: its unrealized gain/loss is included in net return but NOT in the win-rate (win-rate counts closed trades only). Past results do not guarantee future returns. For education only - not financial advice. Generated by PSX Live & Research (free & open-source).
